

HyperJuice Plug Maintains Its Charge with 2 Models at CES

World's First Dual USB Battery Pack that can Recharge 2 iPads at Once

Now Upgraded to Recharge 2X Faster

Tuesday, January 8, 2013 LAS VEGAS, NEVADA: Sanho Corporation (Consumer Electronics Show 2013, North Hall, Booth 4812), creators of the award winning HYPER line of portable power, and storage products, today announced the HyperJuice Plug will be available for hands on demonstrations at the company's booth at CES 2013.

Available in two battery capacities of either 10,400mAh or 15,600mAh, the HyperJuice Plug consists of a high-capacity lithium ion battery pack with two high-powered USB ports. The device enables users to simultaneously recharge two USB devices and is the industry's first to support simultaneous charging of two iPads/tablets. As with all HYPER products, compatibility is never an issue as users of iOS, Android, Blackberry, Windows, all other smartphones, tablets and USB devices can utilize HyperJuice's power with ease.

Notables:

- Features a convenient retractable wall plug for recharging in any electrical outlet, upgraded from a 5W to 10W input, cutting recharging time in half
- 10,400mAh model provides the ability of recharging an iPhone up to seven times, as well as extending the battery life of an iPad 1st or 2nd generation for an additional 15 hours (9 hours for iPad 3rd and 4th generation)
- 15,600mAh version increases iPhone charges to 11 times, while the iPad 1st/2nd generation will receive an extra 23 hours (14 hours for iPad 3th/4th generation)
- 15W power, intelligently shared and actively distributed across both USB ports, always delivering the maximum required charging power to connected USB devices. An iPhone/smartphone will always get 5W power and an iPad/tablet will always get 10W, regardless of which USB port is used. If two iPads/tablets are connected at the same time, both will share the 15W power equally (7.5W each), which is sufficient for iPad/tablet charging.

Product Specifications:

HyperJuice Plug 10,400mAh

Dimensions/Weight: 4.8" x 3.4" x 0.78 inches (123 x 88 x 20 mm) / 12.7 oz (360 g)

Input: 10W, 100-240V AC

Output: 5V, 15W Shared

Charging Time: 4 hours to full charge from empty

HyperJuice Plug 15,600mAh

Dimensions/Weight: 6.1" x 3.4" x 0.78 inches (155 x 88 x 20 mm) / 16 oz (453.5 g)

Input: 10W, 100-240V AC

Output: 5V, 15W Shared

Charging Time: 6 hours to full charge from empty

Price and Availability:

The HyperJuice Plug is available in six colors (pink, blue, green, gold, silver, black), and comes in an aluminum battery housing. A five-level LED battery indicator completes the all-in-one package. The HyperJuice Plug is available immediately online at <http://www.HyperShop.com> at the manufacturer's suggested retail price of \$129.95 for the 10,400mAh model and \$159.95 for the 15,600mAh model.

About Sanho Corporation:

Founded 2005, Sanho designs, manufactures and markets IT accessories with a focus on portable power, storage and Apple accessories. Sanho is committed to developing cutting edge products with a dedicated focus on performance, quality, value and service, with a sales and marketing office in the U.S. in Silicon Valley, California, a production facility near Shanghai, China, and R&D teams in both countries.
